A: You need to crack the trial version in order to obtain a key; it would be counter-productive to crack the version you have. All keys for the trial version of PM Fastrack PMP have to be used after activation. Installing PM Fastrack PMP Trial version You have an option to crack the trial version of PM Fastrack PMP. When you click on it, it will ask for the serial key. Q: Overriding div height to use background image I am trying to create a simple code where there is a background image and a div, the image stretches to 100% height of the div. The idea is to use the background image instead of a border. `body { background: url('background.jpg') no-repeat center center fixed; -webkit-background-size: cover; -moz-background-size: cover; -o-background-size: cover; background-size: cover; } div { height: 100vh; }` I am a beginner in html, css, so please help me understand what am I doing wrong here. A: You can use the property `background-size: contain;` See here : So this is the modified code: `body { background: url('background.jpg') no-repeat center center fixed; -webkit-background-size: cover; -moz-background-size: cover; -o-background-size: cover; background-size: contain; } div { height: 100vh; }` In recent years, as the use of electronic devices, such as smartphones and tablet terminals, is increasing, a large number of people carry the electronic device to perform any activity at anytime and anywhere. For example, when business is done indoors, people carry an electronic device outside to perform the activity. Such activity enables an electronic device to be used to capture images and videos of subjects, such as a building f678ea9f9e
